A dedicated and skilled Data Analyst with a strong background in business information systems and a passion. with a strong background in collecting, analyzing complex data to help organizations make informed, data- driven decisions. By using tools like Excel, SQL, Python and data visualizations platforms such as Power BI to uncover insights and driven business strategies

EDUCATION

2014 TO 2019
BACHELOR OF BUSINESS INFORMATION SYSTEM, CANADIAN INTERNATIONAL COLLAGE

2011 TO 2014
THANAWY AMMA MATHEMATICS, SADEK EL RAFEY

WORK EXPERIENCE

LARAVEL DEVELOPER, THEODOR BILHARZ RESEARCH INSTITUTE (PART TIME)

- Responsible for developing and enhancing the institute's portal and internal system using Laravel for back-end development and PHP for server-side scripting.
- Collaborating with the analysis team to collect and translate business requirements into technical solutions, ensuring alignment with the institute's goals.
- Managing and maintaining SQL databases to support the internal system, optimizing data storage, retrieval, and reporting functionalities.
- Enhancing the front-end user interface using HTML, Bootstrap, and responsive design techniques to ensure a seamless user experience across devices.
- Participating in business meetings with the team leader, senior analyst, technical consultant, and the head of the institute to ensure alignment on project milestones and deliverables

Business Analyst

- Develop plans and solutions to develop and achieve business goals.
- Utilized Excel to aggregate, visualize, and compile data into comprehensive reports, providing insights into performance trends and areas for improvement technical solutions, ensuring alignment with the ins

DATA ANALYST, EGYPTIAN ARMY

- Developed and implemented training courses for officers and soldiers to enhance their skills and competencies.
- Designed and administered various exams to assess and identify individual performance levels.
- Collected, analyzed, and interpreted exam results to evaluate training effectiveness.
- Utilized Excel to aggregate, visualize, and compile data into comprehensive reports, providing insights into performance trends and areas for improvement.

PROJECTS

FNP Company Sales Analysis

This Sales Analysis Project provides key insights into the business performance of Ferns N Petals (FNP) based on sales data across various dimensions, including orders, revenue, product categories, occasions, customer behavior, and geographic distribution.

Tea Export Market Analysis

This analysis presents a comprehensive overview of the global tea export market, highlighting key trends, performance metrics, and top exporters. The goal is to evaluate market dynamics, track performance against targets, and identify growth opportunities across countries and years.

Customer Churn Analysis

This analysis provides actionable insights into customer churn behavior across multiple dimensions including demographics, city-wise distribution, contract type, payment methods, and promotional offers. The objective is to understand the key drivers of churn and inform strategies for improving customer retention.

Restaurant Sales Analysis

This report presents an in-depth analysis of restaurant sales performance over Q1 2023 (January–March). The analysis includes total orders, income distribution, time-based trends, item-level insights, and category performance. The findings aim to help restaurant stakeholders understand customer demand patterns, optimize

GRADUATION PROJECT, CANADIAN INTERNATIONAL COLLEGE

FEASIBILITY STUDY BUILDER (FESABUILDER)

- Developed Fesabuilder, a web-based system designed for startup organizations to automate the creation of feasibility studies by asking users a series of questions.
- The system analyzes responses, compares market competitors, and provides decision-making support.
- Final results are presented as graphs, expense tables, predictable risks, success percentages, and pricing for raw materials based on the Fesabuilder database and user input.
- Utilized the Laravel Framework to develop the project, focusing on efficient data handling and user-friendly functionality.
- **Project Publication:** Presented at the 4th International Conference on New Horizons in Basic and Applied Sciences (ICNHBAS 2019), Hurghada, Egypt (July 26-29, 2019), including an oral presentation titled "A Feasibility Study Building System."

CERTIFICATES

- Data Analysis 365 Skills Certificate.
- Certificate of Participation – 4th International Conference on New Horizons in Basic and Applied Sciences (ICNHBAS 2019), Hurghada, Egypt.
- Data Analysis Certificate – Future Work is Digital (FWD) Program.
- Data Analysis Bootcamp Certificate.

SKILLS

- Excel (PivotTables, VLOOKUP, Power Query)
- SQL & Database Management
- Python (Pandas, NumPy, Matplotlib)
- Power BI
- Data Cleaning & Preparation
- ETL Processes
- Report Automation
- **HTML/CSS**
- **Laravel**
- **PHP**
- **Microsoft Office**
